arcotestCLEANER

arcotestCLEANER is a solution based on ethyl alcohol. It serves to improve cleanliness on various surfaces such as metals, glass and plastics. With the **arcotestCLEANER** also tested parts can be reused by wiping off the test ink. As the surfaces formulations are very different, a suitability test should be carried out before each application.

Properties of the arcotestCLEANER

- better cleanliness due to surface cleaning
- Solvent system based on ethyl alcohol
- no unpleasant odour
- dries very quickly
- can clean in one step and possibly increase adhesion strength
- easy cleaning of the applied test inks
- available in 250 ml aluminium bottles
